ChurchERP

A Complete Church Management System by TondeSoft Ltd

ChurchERP is an all-in-one, cloud-ready church management platform built to help congregations of any size run their ministry with the same discipline, visibility, and efficiency as a modern organisation. From membership records and pastoral care to finances, communication, and administration, every department of the church is brought together on a single, secure platform. The sections below outline each module available in the system and the value it brings to your ministry.

Membership & Congregation

Dashboard	A real-time command centre giving church leadership an at-a-glance view of membership growth, attendance trends, giving totals, and upcoming events, so key decisions are always backed by current data.
Membership	A complete digital register of every church member, including personal details, membership status, and history, replacing paper registers with a searchable, always up-to-date database.
Family Records	Groups members into household and family units, making it easy to track family relationships, communicate with entire households, and understand the congregation's family structure.
Visitors	Captures and follows up on first-time and returning visitors, helping pastoral teams track engagement and convert visitors into active members.
Attendance	Digital attendance tracking for services, cell groups, and events, producing accurate records and trend reports without manual head-counts.
Cell Fellowship	Manages small groups, cell churches, or home fellowships, including membership, leadership, meeting schedules, and growth tracking.
Branches	Coordinates multiple church branches or campuses from one system, giving central oversight while allowing each branch to manage its own local records.

Pastoral Care & Spiritual Growth

Pastoral Care	Enables pastors to log counselling sessions, prayer requests, hospital visits, and follow-ups, ensuring every member receives timely spiritual and personal support.
Prayer	A dedicated module for submitting, tracking, and responding to prayer requests, keeping the prayer ministry organised and responsive.
Marriage Management	Manages marriage counselling, wedding registrations, and related documentation, streamlining the entire process from counselling to ceremony.

Children's Ministry	Handles registration, attendance, and safety check-in/check-out for children's church, giving parents and workers peace of mind.
Sunday School	Organises classes, curricula, teachers, and learner progress for Sunday School programmes across all age groups.

Finance & Resources

Tithes & Giving	Records tithes, offerings, and donations per member or anonymously, with automated statements and giving history for accountability and tax purposes.
Financial Accounting	A full church accounting suite covering income, expenditure, budgets, and financial reporting, keeping the ministry's finances transparent and audit-ready.
Asset Management	Tracks church-owned assets such as equipment, vehicles, and property, including maintenance schedules and depreciation.
Inventory & Store	Manages stock for church stores, bookshops, or supplies, tracking inventory levels, sales, and restocking needs.
Welfare Management	Coordinates welfare support, benevolence funds, and assistance programmes for members in need, with full tracking of requests and disbursements.

Ministry, Outreach & Events

Events	Plans, schedules, and manages church events and programmes, from registration through to post-event reporting.
Ministries	Organises church ministries and departments, their members, leaders, and activities, all in one structured module.
Volunteer Management	Recruits, schedules, and tracks volunteers serving across ministries, simplifying rostering and recognising service.
Evangelism & Missions	Tracks outreach campaigns, mission trips, and evangelism activities, including converts, follow-up, and mission funding.
Projects	Manages church building projects and initiatives with timelines, budgets, and progress tracking from planning to completion.

Communication & Media

Communication	Sends bulk SMS, email, and in-app announcements to members, groups, or branches, keeping the whole congregation informed.

tondesoft.com

Sermons & Media	Archives sermons, videos, and audio recordings for members to revisit, share, or catch up on missed services.
Notifications	Delivers automated alerts and reminders for events, birthdays, follow-ups, and pastoral tasks, so nothing falls through the cracks.
Alfred	ChurchERP's built-in AI assistant, helping staff quickly find records, generate reports, and get guided answers from within the system.

Administration & Governance

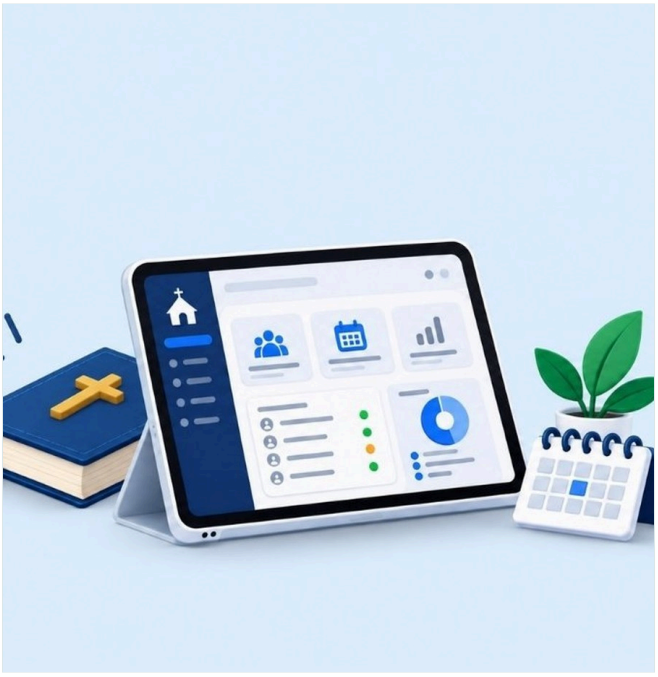

Human Resources	Manages church staff records, payroll, leave, and performance, bringing standard HR practice to ministry administration.
Document Management	Securely stores and organises church documents, certificates, and files, with controlled access for authorised users.
Reports & Analytics	Generates detailed reports and visual analytics across membership, finance, and attendance, supporting data-driven leadership decisions.
Security & Users	Controls system access with role-based permissions, ensuring each staff member or leader only sees what they are authorised to.
Company Setup	Configures core organisational settings, such as branch details, denominational information, and system-wide defaults.
Settings	Customises the ChurchERP system to match each church's preferences, workflows, and operational needs.

Why ChurchERP? Every module is designed to work together, so information entered once — a new member, a giving record, an event registration — flows seamlessly across the system. The result is less paperwork, fewer errors, and more time for leadership to focus on ministry rather than administration.
