ElectroApplianceERP

Feature Overview & Capability Guide

ElectroApplianceERP is TondeSoft's dedicated enterprise resource planning system for electrical and appliance retailers, built to run daily sales, stock, hire-purchase, staff and financial operations from one connected platform across single or multi-branch stores. The sections below outline each module available in the system and what it does for your business.

CORE OPERATIONS

1 Dashboard

A real-time command centre summarising sales, stock levels, hire-purchase status and revenue trends, giving managers an instant overview of how the store is performing the moment they log in.

2 Point of Sale (POS)

A fast, intuitive checkout system for ringing up appliance sales in-store, handling receipts, discounts and multiple payment methods while automatically updating stock in real time.

3 Hire Purchase (HP)

1 DUE

Manages instalment-based appliance purchases, tracking repayment schedules and flagging accounts with a payment due so staff can follow up before balances fall into arrears.

4 Inventory & Stock

Tracks every appliance across warehouses and showrooms — quantities, models, serial numbers and stock movement — so you always know what's available and where.

5 Low-Stock Alerts

10

Automatically flags items falling below their reorder threshold, so purchasing teams can restock fast-moving appliances before they run out and sales are lost.

6 Barcode Scanning & Labels

Generate and print barcode labels for every product, and scan them at checkout or during stock-taking for fast, accurate, error-free inventory handling.

PARTNERS & NETWORK

7

Customers & CRM

Keeps a complete record of customer purchase history, contact details and preferences, helping staff build stronger relationships and follow up on repeat business or after-sales service.

8

Suppliers & Orders

Manages supplier information and purchase orders end-to-end, from placing an order for new appliance stock to tracking delivery and reconciling invoices.

9

Store Locations & Cloud Sync

Connects multiple branches or showrooms on one cloud-synced platform, so stock levels, sales and pricing stay consistent and up to date across every location.

HUMAN RESOURCES

10

Staff Management

Maintains employee records, roles and attendance in one place, making it easy to manage shifts, performance and store staffing across all branches.

11

Payroll Management

Automates salary calculations, deductions and payslip generation, reducing manual payroll work and ensuring staff are paid accurately and on time.

FINANCIALS & TAX

12

Accounting & Reports

A built-in accounting module that consolidates sales, expenses and taxes into clear financial reports, giving owners and accountants an accurate picture of the business at any time.

13

Monthly Revenue Reports

Automatically generated monthly summaries of sales and revenue trends, helping management track growth, compare performance across periods, and plan ahead.

SECURITY & ACCESS

14

Users & Permissions

Controls exactly what each staff member can access within the system, protecting sensitive sales, financial and customer data from unauthorised use.

ElectroApplianceERP is delivered, hosted and supported by TondeSoft Ltd, with modules that can be deployed together or rolled out in phases to match your store's pace and budget. To arrange a live demonstration or discuss a tailored implementation for your business, please reach out using the contact details below.
