LaundryERP

A Complete Laundry & Dry-Cleaning Management System by TondeSoft Ltd

LaundryERP is an all-in-one, cloud-ready management platform built to help laundry and dry-cleaning businesses run day-to-day operations with speed, accuracy, and full visibility. From order tracking and service pricing to inventory, finance, and staff management, every part of the business is brought together on a single, secure platform. The sections below outline each module available in the system and the value it brings to your business.

Overview

Dashboard	A real-time overview of orders, revenue, and customer activity, giving management instant visibility into how the laundry business is performing at any moment.
Orders	Captures and tracks every laundry order from drop-off through washing, pressing, and collection, so staff and customers always know an item's status.
Customers	Maintains a database of customer profiles and order history, enabling faster service, loyalty tracking, and targeted communication.

Operations

Services & Pricing	Defines the services offered, such as wash-and-fold, dry cleaning, and ironing, along with their pricing, ensuring consistent and accurate billing.
Inventory	Tracks stock of detergents, packaging, and other consumables, alerting staff before supplies run low.
Suppliers	Maintains a directory of suppliers with contact details, pricing, and order history, streamlining procurement of laundry supplies.
Purchase Orders	Creates and tracks purchase orders to suppliers from request through to delivery, keeping procurement organised and auditable.
Branches	Manages multiple laundry outlets or drop-off points from a single system, with centralised oversight and branch-level reporting.
Fixed Assets	Tracks laundry machines, delivery vehicles, and other equipment, including maintenance schedules and depreciation.

Finance

Payments	Processes and records customer payments across cash, card, and mobile money, consolidating all revenue streams in one place.

Expenses	Tracks operational expenses such as utilities, detergents, and maintenance, categorised for clear cost analysis.
Accounting	A complete accounting module covering income, expenses, and financial statements, giving owners a clear picture of business performance.
Reports	Generates detailed sales, financial, and operational reports to support informed, data-driven business decisions.

Human Resources

Staff & Roles	Maintains staff profiles and role-based permissions, ensuring each employee has access appropriate to their responsibilities.
Payroll	Automates staff salary calculations, deductions, and payment processing, reducing manual payroll administration.

Administration

Settings	Customises the LaundryERP system to match each business's preferences, workflows, and operational needs.

Why LaundryERP? Every module is designed to work together, so information entered once — an order, a payment, a stock movement — flows seamlessly across the system. The result is faster turnaround, tighter cost control, and more time for management to focus on customer service rather than paperwork.
