PRACTICAL PHARMACY OPERATIONS PLATFORM

PharmacyERP

Integrated Pharmacy Management System

Built for practical pharmacy operations. PharmacyERP is organized into clear operational areas — Core, Clinical, Finance and Admin — helping pharmacy teams move from transaction processing to stock control, patient care, financial management and system administration without leaving the ERP environment.

ONE SYSTEM	BETTER ACCOUNTABILITY	FULL VISIBILITY
Connected pharmacy operations	Traceable, auditable activity	Stock, sales & finance in one view

TONDESOFT PHARMACYERP • CORE

Run the Pharmacy from One Operational Dashboard

The Core section provides the day-to-day tools required to process sales, monitor activity, control stock and move inventory between locations or operational points.

Dashboard	Provides an at-a-glance operational view of the pharmacy — the central starting point for navigating key activities and monitoring the business.
POS / Sales	Supports the front-line sales workflow, giving staff a dedicated point for processing pharmacy transactions and serving customers efficiently.
Sales History	Provides a historical view of sales transactions so users can review previous activity, trace transactions and support reconciliation or reporting.
Inventory	Central stock-management area for keeping track of medicines and other pharmacy items, supporting better stock visibility and control.
Procurement	Supports purchasing and replenishment workflows, helping the pharmacy manage the process of acquiring stock from suppliers.
Stock Transfers	Provides a structured way to move stock between branches, stores or designated stock locations while maintaining an auditable transfer process.

Operational advantage: *Core tools connect the sales counter with inventory and procurement, helping reduce disconnected manual processes and improve visibility across the stock cycle.*

TONDESOFT PHARMACYERP • CLINICAL

Support Patient-Centred Pharmacy Workflows

The Clinical section brings patient and medicine-related workflows together, with tools for prescriptions, expiry monitoring, spoilage, returns and NHIS claim activity.

Patients	Provides a dedicated area for managing patient records and keeping patient-related information organized within the pharmacy system.
Prescriptions	Supports prescription-related workflows, helping staff record, review and manage medicines supplied against prescriptions.
Expiry Tracker	Helps staff identify and monitor products approaching expiry so action can be taken before stock becomes unusable.
Spoilage	Provides a workflow for recording stock that is spoiled, damaged or otherwise unsuitable for sale, supporting inventory accountability.
Returns	Supports the recording and management of returned items or transactions, helping maintain accurate stock and transaction records.
NHIS Claims	Provides a dedicated workspace for managing National Health Insurance Scheme claim-related activity and keeping claim processing separate from ordinary cash sales.

Designed to strengthen control: *By placing patient, prescription and medicine-control functions alongside operational tools such as expiry, spoilage and returns, PharmacyERP is structured to help pharmacies maintain cleaner records and stronger accountability around pharmaceutical stock.*

TONDESOFT PHARMACYERP • FINANCE

Keep Financial Activity Connected to Operations

Finance tools extend the ERP beyond the sales counter, covering credit/debt management, layaways, payouts, expenses, payroll, accounting and reporting.

Debtors	Helps track customers or accounts with outstanding balances, supporting follow-up and better visibility of money owed to the pharmacy.
Layaways	Provides a workflow for managing items or purchases placed on layaway, helping staff track the financial status of these arrangements.
Payouts	Records money paid out from the business, supporting clearer cash accountability and financial reconciliation.
Expenses	Provides a structured area for capturing business expenses so operating costs can be tracked and incorporated into financial oversight.
Payroll	Supports payroll-related administration, giving the business a dedicated place for managing staff pay information and payroll activity.
Accounting	Provides the broader accounting workspace for organizing and monitoring the financial side of pharmacy operations.
Reports	Brings business information into reportable form, supporting management review, analysis and decision-making across operational and financial areas.

Management visibility: *A pharmacy needs more than sales totals. The Finance area is structured to connect money owed, money paid, operating costs, payroll and accounting information with the wider ERP workflow.*

TONDESOFT PHARMACYERP • ADMINISTRATION & CONTROL

Manage People, Permissions & System Configuration

The Admin section provides the controls needed to manage the people using the system and configure the environment in which PharmacyERP operates.

Staff	Provides a central area for managing staff information and supporting the administration of employees using the pharmacy system.
Users & Roles	Controls system users and role-based access, helping organizations assign appropriate permissions to different categories of staff.
Settings	Provides the configuration area for adjusting system-level preferences and operational settings used by the ERP.

What the Complete Platform Brings Together

VALUE AREA	PHARMACYERP CONTRIBUTION
One system	Sales, stock, procurement, clinical workflows and finance are organized within one ERP.
Better accountability	Dedicated transaction and control areas make operational activity easier to review and trace.
Stock awareness	Inventory, procurement, transfers, expiry, spoilage and returns sit within the same operational framework.
Financial oversight	Debtors, layaways, payouts, expenses, payroll, accounting and reports provide a broader financial picture.
Role-based administration	Staff, users and roles support controlled access to the system.

To schedule a demonstration or discuss a PharmacyERP deployment tailored to your pharmacy or branch network, reach TondeSoft Ltd on 0539228215 (call) or 0275498774 (WhatsApp), via facebook.com/tondesoft, or visit tondesoft.com.
