PlasticFactoryERP

A Complete Plastic Manufacturing Management System by TondeSoft Ltd

PlasticFactoryERP is an all-in-one, cloud-ready management platform built for plastic manufacturing operations that need tight control over production, inventory, and finances. From production planning and shop-floor execution to raw material inventory, quality control, procurement, and multi-branch accounting, every part of the factory is brought together on a single, secure platform. The sections below outline each module available in the system and the value it brings to your business.

Overview

Dashboard	A real-time overview of production, orders, inventory, and financial performance, giving factory management instant visibility into daily operations at a glance.

Sales & Customers

Customer Management	Maintains a complete database of customer accounts, order history, and contact details, supporting stronger trading relationships and credit control.
Sales & Order Management	Tracks customer orders from quotation through production and delivery, keeping the sales pipeline organised and easy to follow up on.
Customer Support & Helpdesk	Logs and manages customer enquiries, complaints, and support tickets, ensuring issues are tracked and resolved promptly.

Production & Manufacturing

Production Planning	Schedules production runs based on orders, capacity, and material availability, helping the factory meet deadlines efficiently.
Manufacturing Execution	Tracks the actual production process on the shop floor in real time, from raw material input to finished output, against the production plan.
Bill of Materials	Defines the exact materials, quantities, and processes required to manufacture each product, ensuring consistent costing and production accuracy.
Product Catalogue	A central catalogue of all manufactured products, including specifications, pricing, and packaging details.
Quality Control	Records quality inspections and test results at key production stages, helping maintain consistent product standards and catch defects early.
Machine Management	Tracks factory machinery, including usage, capacity, and operating status, supporting better production planning and asset utilisation.

Maintenance Management	Schedules and logs preventive and corrective maintenance on machinery, reducing unplanned downtime and extending equipment life.

Inventory & Supply Chain

Raw Material Inventory	Tracks stock levels of raw materials and resins in real time, alerting managers before shortages disrupt production.
Finished Goods Warehouse	Manages storage and stock levels of completed products ready for dispatch, keeping warehouse records accurate and organised.
Procurement	Manages the purchasing process for raw materials and supplies, from requisition through to order placement.
Supplier Management	Maintains a directory of suppliers with contact details, pricing, and performance history, streamlining vendor relationships.
Delivery & Dispatch	Coordinates the dispatch of finished goods to customers, tracking delivery status from the warehouse to final destination.
Fleet Management	Tracks delivery vehicles, drivers, and maintenance schedules, keeping the factory's transport operations organised and efficient.
Export & Regional Trade	Manages documentation and processes for export and cross-border trade, supporting compliance with regional trade requirements.

Finance & HR

Financial Accounting	A complete accounting module covering income, expenses, and financial statements, giving owners a clear picture of factory performance.
Payroll & HR	Manages staff records, attendance, and salary processing, bringing standard HR practice to factory administration.
Asset Management	Tracks factory equipment, vehicles, and property assets, including depreciation and maintenance history.
Expense Management	Tracks operational expenses such as utilities, maintenance, and materials, categorised for clear cost analysis and budgeting.

Management & Compliance

Multi-Branch Management	Manages multiple factory sites or warehouses from a single system, with centralised oversight and branch-level reporting.

Reports & Business Intelligence	Generates detailed production, sales, and financial reports with visual analytics to support informed, data-driven decisions.
SMS & Email Notifications	Sends automated alerts for low stock, order updates, and maintenance reminders, keeping the team informed in real time.
User & Security Management	Controls system access with role-based permissions, ensuring staff only see and do what they are authorised to.
System Administration	Provides administrative tools for configuring and maintaining the overall system, keeping operations running smoothly.
Environmental & Regulatory Compliance	Tracks environmental and safety compliance requirements, helping the factory stay audit-ready and aligned with regulations.
Document Management	Securely stores and organises factory documents, certificates, and files, with controlled access for authorised users.
Company Settings	Configures core organisational settings, such as branch details, tax rates, currency, and system-wide defaults.

Why PlasticFactoryERP? Every module is designed to work together, so information entered once — an order, a production run, a stock movement — flows seamlessly across the system. The result is fewer production delays, tighter cost control, and more time for management to focus on growth rather than paperwork.
