PureWaterERP

A Complete Sachet & Bottled Water Factory Management System by TondeSoft Ltd

PureWaterERP is an all-in-one, cloud-ready management platform built for pure water and bottled water factories that need tight control over production, quality, sales, and finances. From production and quality control to inventory, distribution, tax compliance, and multi-branch administration, every part of the business is brought together on a single, secure platform. The sections below outline each module available in the system and the value it brings to your business.

Operations

Ask Alfred	PureWaterERP's built-in AI assistant, helping staff and managers quickly pull reports, find records, and get guided answers from within the system.
Dashboard	A real-time overview of production, sales, inventory, and financial performance, giving management instant visibility into how the factory is running at any moment.
Production	Plans and tracks water production runs, including output volumes and batches, keeping manufacturing aligned with demand.
Quality Control	Records quality checks and test results at key stages of production, helping maintain consistent water quality and catch issues early.
Inventory	Tracks stock levels of raw materials, packaging, and finished products in real time, alerting managers before shortages disrupt operations.
Stock Take	Supports scheduled physical stock counts, comparing actual quantities against system records to catch discrepancies early.
Products	A central catalogue of all manufactured products, including pricing, packaging sizes, and specifications.
Stock Transfers	Manages the movement of stock between warehouses, branches, or production sites, keeping inventory records accurate everywhere it is held.
Fleet & Delivery	Tracks delivery vehicles, drivers, and routes, coordinating the dispatch of finished products to customers and distributors.
Leave Management	Manages staff leave requests and approvals, keeping attendance planning organised across the factory.

Commercial

Sales & Orders	Tracks customer orders from placement through fulfilment, keeping the sales pipeline organised and easy to follow up on.

Customers	Maintains a database of customer accounts, order history, and outstanding balances, supporting stronger trading relationships.
Suppliers	Keeps a directory of suppliers with contact details, pricing, and purchase history, streamlining procurement of raw materials.
Purchase Orders	Creates and tracks purchase orders to suppliers from request through to delivery, keeping procurement organised and auditable.
Purchase Requisitions	Captures internal requests for materials or supplies before they become formal purchase orders, adding a layer of approval and control.
Returns & Credit Notes	Manages product returns and issues credit notes to customers, keeping sales records accurate and disputes resolved fairly.
Sales Commissions	Calculates and tracks commissions earned by sales staff or distributors, ensuring accurate and timely incentive payments.
Customer Loyalty	Rewards repeat customers and distributors with loyalty incentives, encouraging long-term business relationships.
Sales Targets	Sets and tracks sales targets for staff, branches, or products, helping management monitor performance against goals.

Finance

Accounting	A complete accounting module covering income, expenses, and financial statements, giving owners a clear picture of business performance.
Expenses	Tracks operational expenses such as utilities, packaging, and maintenance, categorised for clear cost analysis.
Budgets	Sets and monitors departmental or company-wide budgets, helping management control spending and plan ahead.
Bank Reconciliation	Matches recorded transactions against bank statements to ensure the books stay accurate and discrepancies are caught quickly.
Payroll	Automates staff salary calculations, deductions, and payment processing, reducing manual payroll administration.
Fixed Assets	Tracks production equipment, vehicles, and property, including depreciation and maintenance schedules.
Reports	Generates detailed sales, financial, and operational reports to support informed, data-driven business decisions.
GRA Tax Remittance	Tracks and manages tax obligations owed to the Ghana Revenue Authority, keeping remittances organised and on schedule.

Integrations

SMS & WhatsApp	Sends order confirmations, alerts, and promotional messages to customers and staff directly via SMS and WhatsApp.
Mobile Money	Accepts and reconciles customer payments made through mobile money platforms, streamlining collections.
GRA E-VAT	Integrates with the Ghana Revenue Authority's e-VAT system for seamless, compliant value-added tax invoicing and reporting.
DHIMS2 Health Sync	Synchronises relevant production and health-related data with the DHIMS2 platform, supporting regulatory and public health reporting requirements.

Administration

Branches	Manages multiple factory or distribution locations from a single system, with centralised oversight and branch-level reporting.
Staff Access	Controls which staff members can log into the system and what they can access, forming the foundation of user administration.
Roles & Permissions	Defines role-based permissions across the system, ensuring each staff member only sees and does what they are authorised to.
Activity Log	Records a detailed history of actions taken within the system, providing accountability and traceability across all modules.
Security & Login Audit	Monitors login attempts and security-related events, helping protect the system against unauthorised access.
Compliance Calendar	Tracks upcoming regulatory deadlines and compliance obligations, helping the business stay ahead of filing and renewal dates.
Notifications Center	Centralises system alerts and reminders for stock, orders, compliance, and staff activity, keeping everyone informed in real time.
Company Settings	Configures core organisational settings, such as branch details, tax rates, currency, and system-wide defaults.

Why PureWaterERP? Every module is designed to work together, so information entered once — a production batch, a sale, a tax remittance — flows seamlessly across the system. The result is fewer production delays, tighter compliance, and more time for management to focus on growing the business rather than paperwork.
